To be available on Spotify, iTunes, etc

Leeds-based alternative rock band **masses.** formed in Autumn 2014... a group of 5 professional music producers with the aim of creating a sound that would set them apart from the average. They write timeless and undeniably-British catchy pop-rock songs, but also (as subscribers to the philosophy of "more is more") they're then packed full of technical arrangements, layers of complex vocal harmony and intricate modern production technique, designed to appeal to listeners on as many different levels as possible.

In the first 6 months they had already released 2 singles and their debut EP ***I Couldn't Be Happier***... a record which lays the foundations for their sound. The forthcoming single ***In Circles*** is scheduled for release on 30th Aug, with a beautifully shot and bittersweet music video available to view now on YouTube. Then next for the band is their exciting **twelve|twelve** project, which promises to break new ground with a brand new song released monthly for 12 months.
